**GENERAL SOIL MAP
BUENA VISTA COUNTY, IOWA**

SOIL ASSOCIATIONS *

- 1 Clarion-Nicollet-Carleton association: Well drained to poorly drained, medium-textured and moderately fine textured, nearly level to moderately sloping soils on uplands
- 2 Sac-Pringhar-Carya association: Well drained and somewhat poorly drained, moderately fine textured, nearly level to moderately sloping soils on loess-mottled uplands
- 3 Galva-Sac-Pringhar association: Well drained and somewhat poorly drained, moderately fine textured, nearly level to moderately sloping soils on loess-mottled uplands
- 4 Colo-Gelco-Stillville association: Poorly drained and somewhat poorly drained, moderately fine textured and medium-textured, nearly level and gently sloping soils on bottom lands
- 5 Wadena-Talcot-Cylinder association: Well drained to very poorly drained, medium-textured and moderately fine textured, nearly level to moderately sloping soils on outwash plains and terraces
- 6 Walden-Collinwood-Clarion association: Poorly drained to well drained, medium-textured to fine-textured, nearly level to moderately sloping soils on lands
- 7 Storden association: Somewhat excessively drained, medium-textured, moderately sloping to very steep soils on uplands

*Texture in the descriptive name refers to the surface layer of the major soils in each association.

Compiled 1975

SECTIONALIZED TOWNSHIP

5	5	4	3	2	1
7	8	9	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24
25	26	27	28	29	30
31	32	33	34	35	36

Each area outlined on this map consists of more than one kind of soil. The map is thus meant for general planning rather than a basis for decisions on the use of specific tracts.
